- Projekta apraksts:

Lielākā daļa izglītības izlaiž būtisku mācīšanās dimensiju, proti, mācīšanās estētisko dabu. AECED projekta mērķis ir novērst šo trūkumu. Lai to panāktu, AECED uzlabo un bagātinā izglītību demokrātijai, izveidojot inovatīvu pedagoģisko sistēmu un ar to saistītos ceļvežus, kuros galvenā uzmanība pievērsta estētikai.

EASE LAB

About us

We are a research lab situated at the University of Latvia Institute of Philosophy and Sociology with a background in philosophy and bioethics and training in qualitative research.

We conduct phenomenologically grounded qualitative research, which provides unique insights into embodied and social experiences, generating new knowledge in the fields of Public Health, Digital Health, and Health Services Research.

Our expertise

- 1 Experience in phenomenologically grounded qualitative research about individual's social and embodied experiences related to health care and public health.
- 2 Experience in the field of bioethics studying ethical implications connected to the development of new strategies, technologies and actions related to health, illness and prevention.

Why us?

We can offer a unique approach to study users' experiences and ethical implications connected to the development of new strategies, technologies and actions related to health, illness and prevention relevant in the fields of Public health, Health services research and Digital health among others.

The generated knowledge can inform health policies and actions for health promotion and disease prevention, which are knowledge-based, people-centred, personalised and thus targeted and tailored to individual's needs, and designed to reduce health inequalities.

Our projects

- Hesitant bodies: phenomenological analysis of the embodied experience of vaccine hesitancy
