

ENVIRONMENT MANU-FACTURES

Project description: Aim of the project „Environment manu-factures” is to create historical old towns of Kuldiga and Drobak as the stage for cross-disciplinar contemporary cultural activities that will be developed as result of creative exchange in cooperation between artists from Latvia, Norway, Iceland and Lithuania, therefore promoting dynamic of the province towns’ cultural environment. The central activities of the project will be 2 creative environment actions – one in Kuldiga and one in Drobak in 2014. Environment actions will be developed as 3 parallel running creative workshops or manufactures in such fields as music, street theatre and contemporary art. At the end of workshops there will be organized art actions at historical environment of both towns where will be joined in the results as performances, exhibitions, art actions. All the activities will be organized as open air events, discovering new, unknown event venues in Kuldiga old town, which will be identified and improved within the project, inviting artists to make interpretations of the local cultural heritage according to the developed artistic concept.
