

RESTORATION OF ELEJA MANOR PREMISES

Project description: Eleja Manor and adjoining premises is an architectural monument of national significance, which once was an outstanding construction model in Europe. The tea house and stone fence, which are parts of the monument, currently are in extremely poor condition and are dangerous to visitors.

Project objective: restoration and preservation of the architectural monument of national significance – Eleja Manor tea house and stone fence thus contributing to capacity building of restoration experts and renewing the public significance of culture heritage sites.
Target audience: residents, tourists, students of vocational schools, experts.

Project activities:

1. Restoration and facilitation of tea house and of arch-shaped stone fence for safe use thereof;
2. Summer school for restoration experts and hands-on traineeship for 15 restoration experts to-be;
3. Experience exchange trip of experts to Norway;
4. Project publicity and information events;
5. Project administration and management.
